

## **The easy way up to the sky!**

The Ventura RTF is the easy way up for pilots: it not only includes everything for first flights (except 8 "AA" cells), but offers everything in field-ready condition. However, the Ventura RTF goes beyond the basics to offer a handful of refinements that few other start-up planes can match. And, as the quickest and most maneuverable plane in the FlyZone line-up, the Ventura RTF is a plane that pilots can start with and stay with.

- Included 3-channel radio system offers FM signal clarity and improved interference resistance.
  - Single-stick control of rudder and elevator develops flying skills that simplify the transition to more advanced radios.
  - A throttle lever and an ESC with auto cut-off provide pilots with easy, proportional control of flight power.
  - The prop folds back during landings to prevent prop damage.
  - Included NiMH battery delivers up to 10 minutes of powered flight.
  - FREE DVD offers an easy way to learn and handy tips for successful flying.
  - A red safety button mounted on the fuselage prevents accidental motor starts.
-

The included 3-channel offers FM signal clarity and single-stick control of rudder and elevator, as well as servo reversing, battery LED and a charge jack for optional NiCds. Fingertip throttle control with the left hand leaves the right hand free for hand launches and stick control

### Complete Set Includes:

- 3-Channel FM Radio System with Micro Servos and Receiver
- 380-Size Electric Motor
- Micro Electronic Speed Control with Auto Cut-Off
- 8.4V 900mAh NiMH Battery
- 12V DC Field Charger
- Two folding propellers
- FREE "Get Flying" DVD

The factory-installed radio gear offers the compact size, lightness and dependability of today's best micro electronics.

Flip back the canopy, and the Ventura's on-board NiMH pack is easy to reach and recharge. The DC Field Charger plugs into any convenient 12V outlet for a quick, complete charge.

### SPECIFICATIONS

**Stock Number:** HCAA2010

**Wingspan:** 39.75 in (1010mm)

**Weight (w/battery):** 16.6 oz (470g)

**Length:** 25.4 in (645mm)

**Requires:** 8 "AA" batteries
