

Sail for pleasure—leave work behind.

It's the ultimate R/C pleasure cruise! Not only does the Paradise come with radio system already installed, but even the rigging has been done for you. Factory-finished, the model requires no sanding or painting...and because it's powered by the breeze, you'll need nothing more than a few ordinary "AA" batteries to get your voyage under way.

- Assembles quickly—factory-finished, with radio gear and ballast installed.
- Lightweight, strong fiberglass hull arrives beautifully factory-finished.
- Low-drag keel and boom disconnect for easy transporting.

Available in six different colors!

1. The beautiful fiberglass hull comes ready to enjoy— no time-consuming sanding and painting needed. All of the on-board electronic components have been installed and are easily accessible from the deck hatch. Batteries shown not included.

2. Ballast has already been installed in the Paradise's low drag keel. The keel and boom disconnect for easy transporting—and for easy, secure model display, the Paradise rests in an included, unique, contemporary sailboat stand.

3. An installed steering servo provides control of the Paradise's rudder. The rudder control arm is located in its own hull compartment, which features a quick-access hatch topped off by a replica steering wheel.

4. The boom and mast are made of strong, rigid, and attractive aluminum. Rigging has been completed for you—just match the ends of seven lines to numbered locations, and clip them in place!
