

Auxiliary Products

Abteilung 502 has developed special products to help the modeler to improve his skills, and that includes taking care of your tools. Our new line of thinners can help the modeler achieve all sorts of finishes. We have a thinner that speeds up the drying time of oils and enamels, another thinner which leaves behind a matte finish, and finally we have the classic Odorless Thinner. We also have product to clean and care for you as your hands as well as a liquid mask to protect parts that you don't want painted. We are proud to have a range of very useful products to make the modeler's life easier.
